Border veterinary and phytosanitary inspection department - 251, Rue de Vaugirard - 75 732 PARIS CEDEX 15

**NOTICE**

**Import of pets into the European Union  
from third countries outside the EU**

This document can be accessed on the Ministry of Agriculture website (last updated: October 2023)

**Changes from the previous version (July 2022) are highlighted in grey.**

<http://agriculture.gouv.fr/rage-informations-grand-public-et-voyageurs>

<https://agriculture.gouv.fr/importation-de-produits-animaux-danimaux-vivants-daliments-pour-animaux-et-de-vegetaux>

<https://agriculture.gouv.fr/gare-la-rage>

Pet animals imported from third countries are subject to customs checks on arrival on the territory of the European Union. The checks performed by customs represent an exemption from veterinary checks performed by the border veterinary and phytosanitary inspection department (SIVEP) at Border Inspection Posts (BIP). It is the responsibility of customs personnel to carry out documentary and identity checks on pet animals (up to a maximum of five animals per traveller, all species counted together) at points open for access by international passenger traffic.

**A - Conditions governing the import of dogs, cats and ferrets:**

(Notice in English at the following address: [https://ec.europa.eu/food/animals/pet-movement/eu-legislation/non-commercial-non-eu\\_en](https://ec.europa.eu/food/animals/pet-movement/eu-legislation/non-commercial-non-eu_en))

In order to be imported into the European Union, domestic carnivores accompanying travellers (animals not subject to a commercial transaction, up to a maximum of 5 specimens<sup>(1)</sup>) must:

- **be identified** (e.g. by a microchip implanted under the skin; an animal cannot be identified by means of a tattoo unless it is accompanied by proof that the tattoo was executed prior to 3 July 2011);

To be recognised as valid, vaccination must in all cases be carried out after identification.

- **have a currently valid anti-rabies vaccination** compliant with the provisions of Annex III of Regulation (EU) no. 576/2013 of the European Parliament and of the Council of 12 June 2013 *on the non-commercial movement of pet animals and repealing Regulation (EC) No 998/2003*;

- **have undergone a rabies serum antibody titration test** <sup>(2)</sup> (a laboratory test applied to a blood sample for verification of the efficacy of the vaccination against rabies) on a blood sample taken at least 30 days

following vaccination (primary or booster vaccination) in an **EU-approved laboratory**. The serum titration result must be 0.5UI/ml or higher.

- **be accompanied by the original copy of the sanitary certificate** issued or validated by an official veterinarian in the third country of origin (i.e. a veterinarian appointed by the competent central authority). This certificate must be accompanied by supporting documentation of vaccination against rabies. **In the event of re-entry into the territory of the European Union**, the certificate may be replaced by the animal's passport, subject to the condition that this document must have been completed prior to departure from the European Union. If a booster vaccination has been administered in the third country during the stay, or if titration has been performed in the third country, the passport is no longer valid alone. It is necessary to obtain an animal health certificate signed by the official authorities of the third country, these having sole competency to recognise the validity of the signature of a veterinary practitioner in that third country. Access to the "Non-commercial movement into a Member State of dogs, cats or ferrets" certificate in Annex I.

NB: The animal health certificate remains valid for 10 days from its date of issuance by an official veterinarian and up to the date of the documentary and identity checks at the designated point of entry for travellers into the European Union. In the case of transport by sea, this period of 10 days is extended by an additional period corresponding to the duration of the journey by sea.

In the event of subsequent movements to other Member States (even following a short stay in France), the certificate remains valid for a total period of 4 months as from the date of the documentary and identity checks or up to the expiry date of the validity of the anti-rabies vaccination. The animal health certificate must in this case have been signed by a customs officer at the time of arrival in France.

|   |   |
|---|---|
| <b>Advice to persons resident in France</b> | <b>Leave EU territory only with an animal that is identified and has a valid rabies vaccination and a satisfactory titration result.</b><br>Consult the attending veterinarian again <b>at least three months prior to departure.</b> |
|---|---|

**Important clarifications:**

**(1) Derogation concerning the maximum number of dogs, cats and ferrets:**

*The maximum number of pet dogs, cats and ferrets imported into the European Union may exceed five where:*

- *non-commercial movement of these animals relates to their participation in competitions, exhibitions, sporting events or training for the purpose of such events; and*
- *the owner or authorised person presents written proof that the animals have been duly registered for participation in one of the aforementioned events, or with their organising association;*

*and*

- *the animals are more than 6 months old.*

*Animals covered by the above derogation must be imported in conjunction with the model certificate entitled "non-commercial movement of dogs, cats or ferrets" according to Annex IV of Regulation 577/2013. The number of animals covered by this derogation is not subject to any maximum limit.*

## **(2) Rabies antibody titration**

The blood sample required for rabies serum antibody titration must have been taken by an approved laboratory **at least 3 months prior to import as of the date of sampling** on an animal whose anti-rabies vaccination is currently valid at the time of sampling. A list of approved laboratories:

[https://ec.europa.eu/food/animals/movement-pets/approved-rabies-serology-laboratories\\_en](https://ec.europa.eu/food/animals/movement-pets/approved-rabies-serology-laboratories_en)

The 3-month period does not apply where a pet is reintroduced to the territory of the European Union if titration has been performed with a satisfactory outcome **before** its departure from European Union territory.

The serum titration result remains valid **for the whole of the animal's lifetime**, on condition that the validity of its vaccination against rabies is maintained (i.e. with booster vaccinations at the required intervals).

A period of three months between sampling for titration and import of the animal is required by EU regulations since the titration testing does not allow antibodies present due to vaccination to be differentiated from those due to possible infection in the third country. The three-month period provides certainty that detected antibodies do not relate to an infection, since this would have led to the animal's death during that period.

### **List of countries not required to perform rabies antibody titration testing**

**Serum titration is not required for animals arriving from or transiting through any of the countries identified in Regulation (EC) no. 577/2013 – parts 1 and 2:** Andorra, Antigua and Barbuda, Argentina, Aruba, Australia, Bahrain, Barbados, Byelorussia, Bermuda, Bosnia-Herzegovina, Canada, Chile, Curaçao, United Arab Emirates, United States of America (including Guam, American Samoa, Northern Mariana Islands, Puerto Rico and the United States Virgin Islands), Fiji, Gibraltar, Great Britain, Greenland, Guernsey, Hong Kong, Ascension Island, BES islands (Bonaire, Sint Eustatius and Saba), Cayman Islands, Falkland Islands, Faroes, Isle of Man, British Virgin Islands, Wallis and Futuna, Iceland, Jamaica, Japan, Jersey, Liechtenstein, Northern Macedonia, Malaysia, Mauritius, Mexico, Monaco, Montserrat, New Caledonia, New Zealand, French Polynesia, Russia, Saint Kitts and Nevis, Saint Helena, Saint Lucia, San Marino, Sint-Maarten (Dutch part), Saint Pierre and Miquelon, Saint Vincent and the Grenadines, Singapore, Switzerland, Taiwan, Trinidad and Tobago, Vatican City State, Vanuatu.

In the event of transit through a country not exempted from rabies antibody titration: the owner or authorised person must provide a declaration stating that the animal has not been in contact with any species susceptible to rabies during the transit and has remained confined in the means of transport or on the premises of the international airport (model declaration in Annex III).

### **Microchip identification**

If an animal is **identified by microchip**, the latter must be compliant with standard ISO 11784 and implement HDX or FDX-B technology, or comply with Annex A of ISO 11785. If this is not the case, the owner of the animal or the natural person accepting responsibility for it must provide the means to read the electronic chip.

### **Animals less than 12 weeks old:**

The introduction into France of unvaccinated dogs, cats and ferrets aged less than 12 weeks is prohibited.

### **Animals more than 12 weeks old:**

Dogs, cats and ferrets introduced must have received an anti-rabies vaccination meeting the requirements for validity set out in Annex III of Regulation (EU) no. 576/2013 of the European Parliament and of the Council of 12 June 2013 on the non-commercial movement of pet animals. Due to this, the introduction into France of dogs, cats and ferrets aged 12 to 16 weeks and vaccinated against rabies, but failing to meet the requirements for validity set out at point 2e) of Annex III of the aforementioned Regulation (EU) 576/2013, is not permitted.

**Furthermore, in accordance with the provisions contained in Article L.236-1 of the French Rural and Maritime Fisheries Code, no dog imported from a third country can enter national territory unless it has at least one adult tooth.**

### **Non-commercial movement of military dogs and search & rescue dogs:**

Such animals may be brought into France at a point of entry other than a travellers' point of entry following authorisation and subject to compliance checks.

### **Checks on arrival**

Under the Customs Code and Article 34 of Regulation 576/2013, travellers are obliged to present their pet animals spontaneously to customs on arrival in France. It is not necessary to make an appointment with customs in advance. Travellers will go through a passenger filter (i.e. in front of customs personnel) before leaving the international zone.

The owner or authorised person is under an obligation to travel with the pet during the non-commercial movement. However, non-commercial movements of dogs, cats and ferrets travelling five days before or after movement of the owner or authorised person is acceptable if supporting documentation is provided (e.g. boarding pass, flight ticket) (cf. model declaration in Annex II).

### **Categories 1 and 2 "dangerous" dogs and Bengal/Savannah cats**

Only Category 2 attack dogs as defined by the official order of 27 April 1999 are authorised for import. These belong to the following breeds: Staffordshire terrier, American Staffordshire terrier (Pitbulls), Tosa and dogs with morphologies similar to the Rottweiler breed, **as registered in a studbook**. These dogs may be imported if the conditions set out above are adhered to and documentary evidence of registration in a studbook is produced.

The rules governing movement and holding of category 2 dogs apply (cf. summary information document to be found on Impadon:

<https://teleprocedures.franceagrimer.fr/Impadon/Login/Login.aspx?ReturnUrl=%2fImpadon%2fCompteUtilisateur%2fChoisirProfil.aspx>)

Conversely, dogs similar to Staffordshire terriers, American Staffordshire terriers (pit bulls), mastiffs (Boerboel), and Tosas, and **not registered in a studbook**, are considered category 1 attack dogs. Their import into France is prohibited.

<http://www.legifrance.gouv.fr/affichTexte.do?cidTexte=JORFTEXT000000210847&dateTexte=>

Bengal and Savannah cats are recognized as distinct breeds by the Official Book of Feline Origins (*Livre Officiel des Origines Félines* – LOOF). However, if the owner of a cat cannot demonstrate that it belongs to one of these breeds at the time of import (birth certificate or pedigree), it must be considered to be a mixed-breed animal whose import is therefore subject to prior issuance of an import permit, which must be obtained from the applicable Regional Directorate for the Environment, Regional Development and Housing (*Direction Régionale de l'Environnement, de l'Aménagement et du Logement* – DREAL) (cf. information summary document posted by the Ministry for the Ecological and Inclusive Transition on the Impadon website: <https://teleprocedures.franceagrimer.fr/Impadon/Login/Login.aspx?ReturnUrl=%2fimpadon>)

**Guide dogs and Assistance Animals:** no import derogation applies in the case of such animals, which must adhere to the EU regulations in force with regard to importing domestic carnivores from third countries.

### **Specific measures applicable to travellers to Saint Martin**

The airport of arrival is located on Sint Marteen (Dutch part). Travellers to Saint Martin (French part) must complete an import permit in the Dutch section, even for a short transit (return home from the airport).

See export conditions on EXPADON: <https://teleprocedures.franceagrimer.fr/Expadon/>

### **Invasive Exotic Species (IES)**

Private individuals may hold – and therefore may carry and import from third countries – their pets where these belong to species defined by regulation as IES, subject to following cumulative conditions:

- the animal must have been held prior to implementation of the regulation at a date set by official order, this being 2 August 2017,
- the animal must have been declared to a Prefecture before 1 July 2019,
- it must have been confined in a manner preventing escape,
- it must not have bred,

- it must have been marked.

Conversely, where such animals were not held prior to 2 August 2017, their import, holding and carriage are prohibited in this case.

The obligation to declare animals to a Prefecture before 1 July 2019 also restricts the possibilities for the reimport of animals previously declared to a Prefecture and does not permit the introduction of animals belonging to an IES if they have never been in France.

You will find more detailed information on IES at the following address:

<https://www.ecologie.gouv.fr/especes-exotiques-envahissantes>

#### Specific cases: (commercial movements)

If the number of domestic carnivores accompanying a traveller (animals not subject to a commercial transaction) exceeds the limit of 5 specimens in the absence of the aforementioned derogation<sup>(1)</sup>, if the animals are travelling without their owner or the authorised person within the five-day authorised period, if the animals are sold during carriage, the movement will be considered to be commercial and must meet the following criteria:

- inspection at a border inspection post designated for checks on the relevant species,

- the country of provenance must be authorised (cf. Annexe VIII part 1 of Regulation (EU) 2021/404),

<https://eur-lex.europa.eu/legal-content/FR/TXT/?uri=CELEX%3A02021R0404-20211111&qid=1638884913258>

- the model animal health certificate in Annex II, Chapter 38 of Regulation (EU) 2021/403 must be used (commercial movements).

<https://eur-lex.europa.eu/legal-content/FR/TXT/?uri=CELEX%3A32021R0403&qid=1638885119503>

Additionally, in compliance with the provisions of Article L 236-1 of the French Rural and Maritime Fisheries Code, no dog may be imported from a third country into French territory unless it has at least one adult tooth.

#### **B- Conditions governing the import of pet birds (cf. Annex V)**

Delegated regulation (EU) 2021/1933 and Implementing Regulation (EU) 2021/1938 came into force on 1 January 2022, repealing Decision 2007/25/EC.

Pet birds are defined in Annex I, part B of Regulation (EU) 576/2013:

Birds: specimens of avian species other than those referred to in Article 2 of Directive 2009/158/EC, repealed by Regulation (EU) 2016/ 429.

This regulation defines pets as follows:

‘pet animal’ means an animal of a species listed in Annex I held for private, non-commercial purposes.

In Annex I: Birds: specimens of avian species other than fowl, turkeys, guinea fowl, ducks, geese, quails, pigeons, pheasants, partridges and ratites (Ratitae).

A collared dove may therefore be considered to be a pet bird, unlike a pigeon, for example.

#### Marking pet birds:

Pet birds must be marked using a method of permanent, indelible marking showing an alphanumeric code (ring, transponder or tattoo) prior to being isolated, tested or vaccinated against sub-types H5 and H7 of the avian influenza virus.

Due to cases of avian influenza in several third countries, the **conditions governing import of pet birds have been reinforced**. Pursuant to Delegated Regulation (EU) 2021/1933, a maximum of five pet birds may be imported if the birds are accompanied by their owner or the authorised person during a single non-commercial movement and are accompanied by an **animal health certificate** and a **declaration by the owner** or the owner's representative. Moreover, one of the following additional conditions must be met:

- isolation for 30 days preceding the date of despatch, under official supervision at the departure location in a country shown in the first column of the table in part 1 of Annex V, Annex XIV or Annex XIX of Implementing Regulation (EU) 2021/404, (updates to this regulation can be found on the European Commission website: <https://eur-lex.europa.eu/homepage.html?locale=fr>

(it is the responsibility of the competent veterinary authorities in the third country of departure to define the detailed arrangements for the aforementioned official supervision and to ensure its practical application)

- primary vaccination and at least one booster vaccination against H5 or H7 avian influenza virus during the previous six months and at least 60 days prior to import (the vaccine or vaccines used must have been approved for the relevant species in accordance with the manufacturer's instructions and must not be an attenuated live vaccine; it must also be administered by an authorised veterinarian or an official veterinarian in the third country of despatch);

- **PCR** testing for detection of H5 and H7 avian influenza virus yielding a negative result on a sample taken no earlier than the seventh day of isolation of the animal under the supervision of an authorised veterinarian or an official veterinarian at least 14 days prior to import (a serum test is not sufficient).

For an indicative list of laboratories:

[http://ec.europa.eu/food/animal/diseases/controlmeasures/avian/list\\_nat\\_labs\\_en.htm](http://ec.europa.eu/food/animal/diseases/controlmeasures/avian/list_nat_labs_en.htm)

## **AND**

the birds must be transferred by their owner or an authorised person directly from the traveller's point of entry to a private household or other residence within the EU, locations where the birds must be held under official supervision for the 30 days following their entry into the European Union, a period during which the birds must not be introduced into any gathering of birds (e.g. show venues, fairs, exhibitions).

To that end, the Departmental Directorate responsible for the protection of the public at the destination where the birds are to be held must be informed of their arrival by the owner in order for them to be placed under supervision by official order of the Prefecture. The latter order will be rescinded on expiry of the 30 days of supervision after the owner has confirmed to the DDecPP that the birds are in satisfactory health. The DDecPP must be immediately notified of any incident (illness, loss or death of the animal) occurring during the 30 days following their entry into the European Union.

## **C- Conditions governing the import of rodents, lagomorphs, reptiles, amphibians and warm-water, ornamental tropical fish into France (Annex IV)**

---

To be able to be imported into France (subject to a maximum of 5 specimens), ornamental tropical fish, rodents, lagomorphs, reptiles, and amphibians kept as pets must be accompanied by an associated document (bilingual model) appended to the present notice and compliant with the model in Annex 27 of the official order of 19 July 2002 signed by a veterinary practitioner (a veterinarian authorised to practise veterinary medicine).

There are specific conditions for the introduction of these animals into other Member States of the European Union. Please consult the embassies of those countries in the third country of residence.

## **D- Other animals**

---

The import of primates as pets is not authorised. Specific conditions govern the introduction of these animals into other Member States of the European Union. It is recommended that the embassies of those countries be consulted to obtain more details.

## **E- General import conditions concerning species protection**

---

Particular conditions and restrictions apply to animals belonging to species protected under the Washington Convention (Convention on International Trade in Endangered Species of Wild Fauna and Flora or CITES) <http://www.cites.org/fra/index.shtml>).

## **F- Penalties for non-adherence to regulatory obligations**

---

Where the aforementioned health conditions are not adhered to, pursuant to Articles L.236-9 and L.236-10 of the French Rural and Maritime Fisheries Code, the officers responsible for application of checks may order, at the expense of the owner, that the animal be shipped back to the third country of origin, that it be placed in quarantine or that it be euthanised.

Where failure to adhere to regulations leads to or involuntarily promotes the spread of an epizootic in domestic or wild vertebrates, or in insects, crustaceans or farmed molluscs, such failure is subject to a fine of €300,000 and a term of imprisonment of two years (cf. Article L.237-3 of the French Rural and Maritime Fisheries Code).

Furthermore, where failure to adhere to mandatory instructions given pursuant to Article L.236-9 has led to serious harm to human or animal health, the applicable penalties are increased to a term of imprisonment of five years and a fine of €600,000. Additional penalties also exist for natural persons and legal entities.

## **G- Conditions governing the import into France of blood of animal origin collected for use in laboratory diagnostics**

---

Commission Regulation (EU) no.142/2011 of 25 February 2011 implementing Regulation (EC) No 1069/2009 of the European Parliament and of the Council laying down health rules as regards animal by-products and derived products not intended for human consumption and implementing Council Directive 97/78/EC as regards certain samples and items exempt from veterinary checks at the border under that Directive.

Blood samples sent to France for the performance of the titration of antibodies neutralising the rabies virus (rabies vaccine efficacy testing) must be covered by a prior authorisation to be requested by the destination laboratory from the competent authority at the destination (DDCSPP). That request must specify the following:

- the nature of the product (*“animal blood prepared for diagnostic testing”*), the animal species, potential treatment;
- the quantity;
- the country of despatch; the name and address of the sender;
- the name, address and registration number of the destination laboratory;
- the intended use: *“product intended for laboratory diagnostic testing”*.

It is the responsibility of the veterinary practitioner who has taken the sample or the owner of the animal to obtain information in advance from the airline on the conditions governing shipment of samples.

It is the responsibility of the veterinarian to arrange for the sample to be sent to the destination laboratory and to ensure that the sample is in fact received by that laboratory.

**Annexe I: certificat sanitaire pour les mouvements non commerciaux, à destination d'un État membre depuis un territoire ou un pays tiers, de chiens, de chats ou de furets effectués conformément à l'article 5, paragraphes 1 et 2, du règlement (UE) n° 576/2013<sup>(1)</sup> / animal health certificate for the non-commercial movement into a Member State from a territory or third country of dogs, cats or ferrets in accordance with Article 5(1) and (2) of Regulation (EU) n°576/2013<sup>(1)</sup>**

## Partie 2 / Part 2

**Notes expliquant comment compléter les certificats zoosanitaires / Explanatory notes for completing the animal health certificates**

- a) Lorsqu'il est précisé dans le certificat qu'il convient de choisir, parmi une série de mentions, celle qui convient, les mentions inutiles peuvent être biffées par le vétérinaire officiel, qui doit en outre y apposer son paraphe et son sceau, ou être entièrement supprimées / *Where the certificate states that certain statements shall be kept as appropriate, statements which are not relevant may be crossed out and initialled and stamped by the official veterinarian, or completely deleted from the certificate.*
- b) L'original de chaque certificat se compose d'une seule feuille de papier, ou, si cela ne suffit pas, il doit être présenté de façon à ce que toutes les feuilles de papier nécessaires fassent partie d'un tout intégré et indivisible / *The original of each certificate shall consist of a single sheet of paper, or, where more text is required it must be in such a form that all sheets of paper required are part of an integrated whole and indivisible.*
- c) Le certificat est établi dans au moins une des langues officielles de l'État membre d'entrée ainsi qu'en anglais. Il est rempli en caractères majuscules, dans au moins une des langues officielles de l'État membre d'entrée ou en anglais / *The certificate shall be drawn up in at least one of the official languages of the Member State of entry and in English. It shall be completed in block letters in at least one of the official languages of the Member State of entry or in English.*
- d) Si des feuilles ou des justificatifs supplémentaires sont joints au certificat, ceux-ci sont réputés faire partie du certificat original; le vétérinaire officiel appose sa signature et son sceau sur chacune des pages / *If additional sheets of paper or supporting documents are attached to the certificate, those sheets of paper or document shall also be considered as forming part of the original of the certificate by the application of the signature and stamp of the official veterinarian, on each of the pages.*
- e) Lorsque le certificat, y compris les feuilles supplémentaires visées au point d), comporte plus d'une page, chaque page doit être numérotée au bas de la page — (numéro de la page) de (nombre total de pages) — et le numéro de référence du certificat attribué par l'autorité compétente doit figurer en haut de chaque page / *When the certificate, including additional sheets referred to in point (d), comprises more than one page, each page shall be numbered (page number of total number of pages) at the end of the page and shall bear at the top of each page the certificate reference number that has been designated by the competent authority.*
- f) Le certificat original est délivré par un vétérinaire officiel du territoire ou du pays tiers d'expédition ou par un vétérinaire habilité, puis approuvé par l'autorité compétente du territoire ou du pays tiers d'expédition. L'autorité compétente du territoire ou du pays tiers d'expédition garantit le respect de règles et de principes de certification équivalant à ceux fixés dans la directive 96/93/CE / *The original of the certificate shall be issued by an official veterinarian of the territory or third country of dispatch or by an authorised veterinarian and subsequently endorsed by the competent authority of the territory or third country of dispatch. The competent authority of the territory or third country of dispatch shall ensure that rules and principles of certification equivalent to those laid down in Directive 96/93/EC are followed.*
- La couleur de la signature est différente de celle du texte imprimé. Cette règle vaut également pour les sceaux, à l'exception des reliefs et des filigranes / *The colour of the signature shall be different from that of the printing. This requirement also applies to stamps other than those embossed or watermarked.*
- g) Le numéro de référence du certificat visé dans les cases I.2 et II.a. est délivré par l'autorité compétente du territoire ou du pays tiers d'expédition / *The certificate reference number referred to in boxes I.2 and II.a. shall be issued by the competent authority of the territory or third country of dispatch.*

## Annexe II: Modèle de déclaration / *Model of declaration*

Je, soussigné / *I, the undersigned*

.....  
[propriétaire ou personne physique que le propriétaire autorise, par écrit, à effectuer un mouvement non commercial des animaux de compagnie en son nom <sup>(1)</sup>/ *owner or the natural person who has authorisation in writing from the owner to carry out the non-commercial movement on behalf of the owner<sup>(1)</sup>*]

déclare que les animaux de compagnie mentionnés ci-après ne font pas l'objet d'un mouvement qui vise leur vente ou un transfert de propriété et accompagneront le propriétaire ou la personne physique que le propriétaire autorise, par écrit, à effectuer le mouvement non commercial en son nom <sup>(1)</sup> jusqu'à cinq jours avant ou après son déplacement / *declare that the following pet animals are not subject to a movement that aims at their sale or a transfer of ownership and will accompany the owner or the natural person who has authorisation in writing from the owner to carry out the non-commercial movement on behalf of the owner<sup>(1)</sup> within not more than 5 days of his movement.*

| Code alphanumérique du transpondeur/tatouage <sup>(1)</sup> /<br>Transponder/tattoo <sup>(1)</sup> alphanumeric code | Numéro du certificat sanitaire / <i>Animal health certificate number</i> |
|--|--|
